Main Street Project Progress Update

What's Been Going On?

This week we finished a run of storm line at the Tech Center, relocated a few hydrants and saw cut A-LOT of asphalt. Kennedy Drive bore the brunt of our efforts and is a bit beat up. Don't worry, Kennedy will get treated right late in October when we replace the water main and completely re-grade the street. Many of the structures and pipe have now arrived and the contractor is ready to hit things hard next week.

What's Coming Up?

For the week of 10/3 the contractor will begin storm work between the bridge and Kennedy on Monday, with a second crew doing a water cut-in near 145th. Tuesday we'll start Joint Utility Trench (JUT– power, phone, cable) installation at Valley Street. Those items should keep everyone busy all week.

Traffic delays should be expected with alternating single lanes of traffic throughout the work days. Did I mention the work is focused at Kennedy and Valley?

You drivers are handling the project chicanes and traffic control very well, thanks!
